Topography map:

IGM F. ° 18 III S.E. Mezzoldo

Geographical coordinates:

45,6902595° N, 9,7170326° E

The Ancogno cheese factory is located two hairpin bends before arriving at the "Passo San Marco 2000" hut, where the road makes a wide curve following the ridge separating the Alpe Ancogno and Alpe Cul alpine pastures. From this point rises the rounded relief of Dosso Gambetta, the watershed between the Valle di Mezzoldo and the Val Mora.

When you reach hairpin bend n°10 of the road towards Ca' San Marco, park your car at the side of the road.

On the bend of hairpin bend n°10, our slightly downhill path begins.

We follow CAI path 113 and skirt the Ancogno hut.

The path is on a ground surface with small stones.

We pass a cemented basin.

Continuing on a slight descent, we advance on cobbled terrain.

Still on a slight descent, we pass another stone basin and a pond on the right.

On our left we pass the signpost for the Cantedoldo hut.

We reach a large pool carved into the rock and a red and white marker post.

Following the stake and leaving the direction towards the hut, we ascend the meadow to our right in a northerly direction.

We continue on the meadow following the grassy ridge.

After passing a few bumps, we reach the ridge of Dosso Gambetta, where we can see the disused Milan AEM tollgate in the distance.

At the tollgate, we take the path to the left and continue slightly uphill.

We reach the highest point of the ridge at "Montù" (1854 m).

At this point we can enjoy a 360° panorama.

We turn our gaze to the other side.

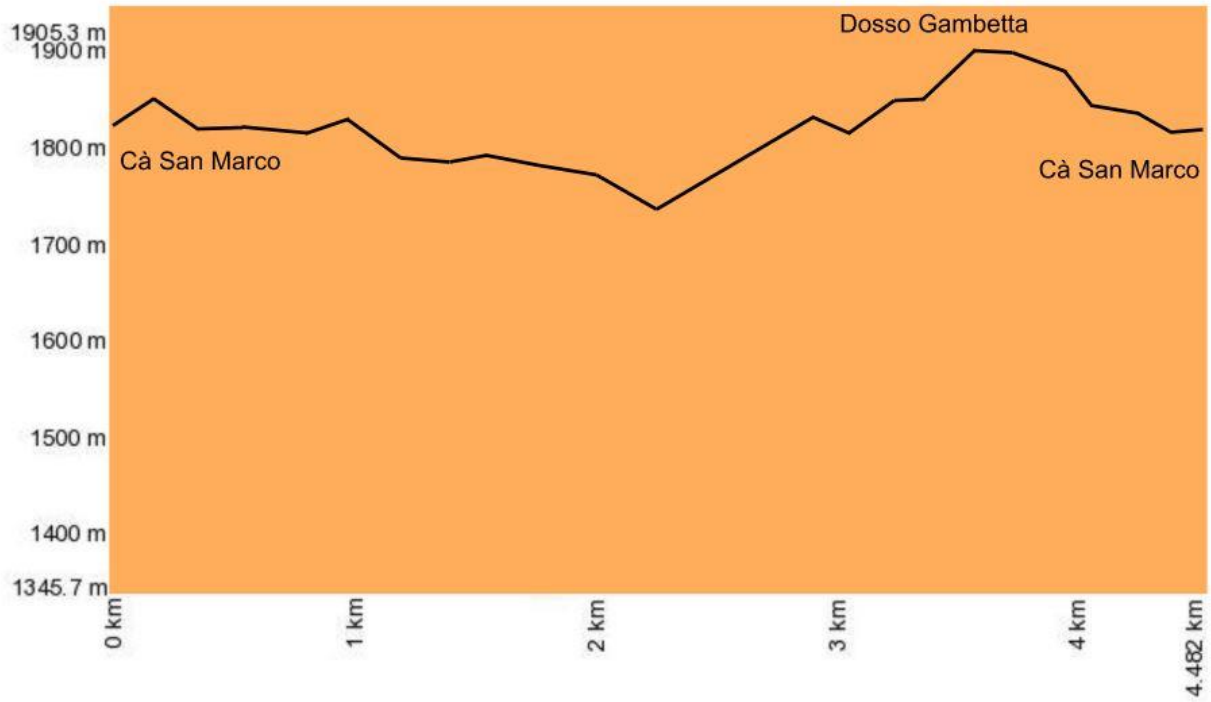

We now begin our descent towards the concrete basin.

After a few minutes' descent we reach the Ancogno cheese factory, from where our hike began.
